CONCRETE GRINDING & POLISHING

W.A.M Floors is Sale's premier supplier of polished concrete flooring.
This versatile option can be used both inside and out and is functional and long lasting

CARE & MAINTENANCE OF POLISHED CONCRETE

Polished concrete floors have the objective of providing a floor with minimal ongoing maintenance.

Polished concrete floors should be cleaned on a regular basis consisting of:

- Remove spills as they happen
- Daily sweeping or dry mopping of the floor to remove abrasive dirt particles
- Weekly mopping of the floors with a microfiber mop and a PH Neutral cleaner

This simple cleaning should be carried out to keep the floor looking it's best. Naturally it will be dependant on the type and amount of usage to determine how often the floor is cleaned.

Be aware that Polished Concrete floors may be slippery, particularly when wet. Attentiveness and care should be taken as no responsibility is accepted.
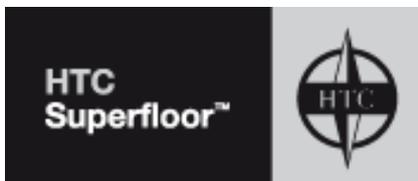

Polished Concrete Floors should never be pressure washed, never use Bleach, Citrus or Acid Based cleaners or abrasive buffing machines as this will damage the surface.

If over time your floor does become dull, W.A.M. Floors also offers the service of coming in and burnishing the floor to revitalise the surface and can also repair chips and cracks. Coated floors may need to be re-coated every 7-8 years.

Some simple tips:
- Have a good quality doormat at all entries to limit the amount of dust and grit that is carried inside.
- Spills should be cleaned up straight away to avoid penetration or damage
- Use a dry mop regularly
- Fit protective pads to chairs and tables
- Castor legs should be fitted with castor cups
- When mopping the floor ensure that the mop head is checked regularly and the mop head is rinsed out when soiled to prevent dirty smears on the floor.
