CONCRETE GRINDING & POLISHING

W.A.M Floors believes that to get the best out of your floor, you need the best equipment. That is why we will always look for equipment that not only gives our clients the best finish, but also gives us options, enabling us to work in a variety of environments.

CONCRETE REPAIRS

W.A.M. Floors don't lay concrete, however, we do finish and repair them, giving them a new look or by removing trip hazards to make them safer.

Over time, concrete can be affected by water damage, foundation slippage, accidental trauma or simple wear and tear. Using Schibeci and Tyrolit HTC commercial concrete equipment, W.A.M Floors is able to service and maintain concrete surfaces in the residential, commercial and agricultural industries.

From milling up to 25mm in a single pass, to fine diamond grinding, W.A.M Floors are accredited HTC operators and are able to remove the aged look and dangerous areas of your concrete surfaces, leaving behind a designer polished concrete surface,

More importantly, all work is completed to Australian Standards.
