

W.A.M. FLOORS

TERRAZO & VINYL CONCRETE GRINDING & POLISHING

Supply & Installation

W.A.M Floors believes that to get the best out of your floor, you need the best equipment. That is why we will always look for equipment that not only gives our clients the best finish, but also gives us options, enabling us to work in a variety of environments.

DINGO GRINDER

W.A.M Floors' Dingo Grinder enables them to grind areas where there is no power available. With a hydraulic side shift and swivel, they are able to grind close to walls, corners and obstacles.

The Dingo Grinder also has fully floating heads which allow the machine to follow the contours of the floor and reach low spots on the floors. The Dingo Grinder also features spray jets and water feed for dust suppression and The Direct Drive Design removes the need for high maintenance planetary gear boxes, belt or pulley drives.

The Dingo Grinder has a grinding width of 750mm (30 inches) and a grinding range of 6 – 8000 Grit Diamonds and can be used both on indoor and outdoor surfaces.

At W.A.M Floors, our priority is creating the floor surface that you want. For us to do this, we source the right equipment for the job.
